

..... CHAPTER 2 .....

# REVIT ARCHITECTURE - LEVEL 1

This chapter presents the work step adopted for the BIM model using Revit Architecture. It also discusses the scopes and components of the Revit Architecture software, and concludes by showing the requirements necessary for effective use of model detailed design (LOD 300).

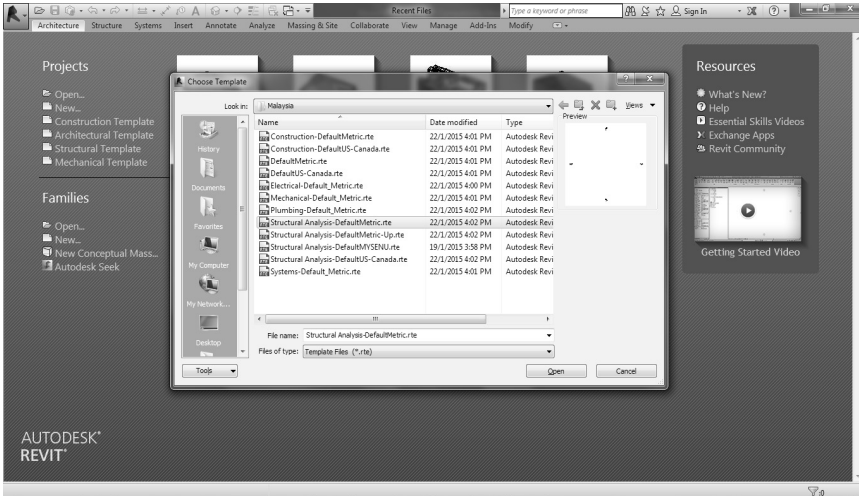

## 2.1 Levelling

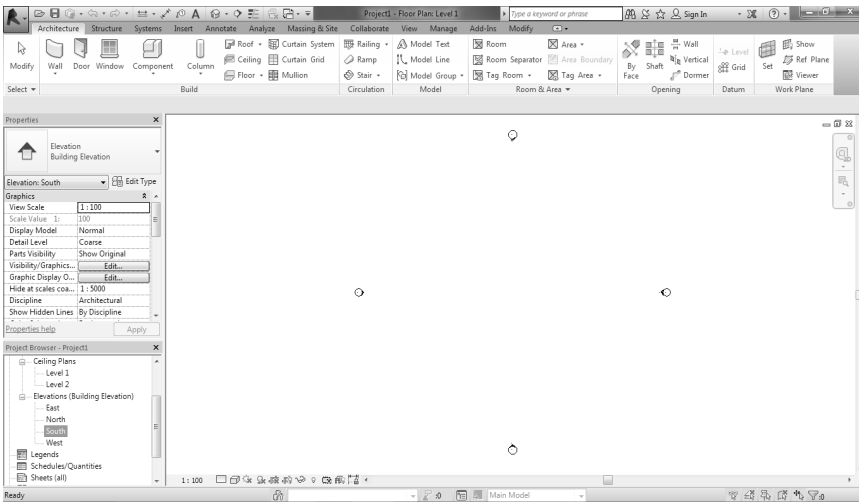

**Open the Revit.**

# BIM MODELLING TECHNIQUES FOR IBS BUILDING

## Practical Guidance for Constructions Professionals

Click New project. Then choose architectural template and click default metric.

Go to project browser. In the elevation list, click south.
